

March 2013 - Contract signed for RoPax Ferry for Samsø

OSK-ShipTech's assignment to prepare the tender design, conduct an EU tender and assist in contract negotiations was concluded on Monday the 18th March 2013, when Samsø Kommune signed a contract with the Polish shipyard Remontowa, Gdansk for construction of a new passenger ferry.

Present at the signing were from left:
Mr. Jan Paszkowski, Remontowa, Mayor of Samsø Mr. Jørn C. Nissen, Mr. Andrzej Wojtkiewicz,
Remontowa.

The ferry which will be driven by LNG will be the first of its kind on domestic routes in Denmark and reflects the "green profile" which is characteristic of the island of Samsø. The ferry is designed as an open double-ended ferry with capacity for up to 160 cars and 600 passengers. Propulsion will be by four azimuth rudder propellers electrically driven from dual fuel LNG/MGO generator sets.
